## PowerPACS™ Advanced Cloud Services

### Upload and Attach Reports

Allows the user to upload any type of files to the patient's study.

### Burn Patient CD

Allows the user to create DICOM CDs with a RSVS viewer.

### Download Study

Allows the user to download full DICOM compliant diagnostic quality images.

### Study Assignment

Assign image studies to designated users that gives full access to that patient file.

### Teleradiology

Provides tools for medical professionals to transmit DICOM data between the cloud and local systems.

### Chat

Allows a user to live chat on-line with another user.

### View High Definition (HD) Image

Allows the user to view images in HD format.

## About RADinfo SYSTEM™

Established in 1993, RADinfo SYSTEMS develops and supports Cloud computing, Windows-based, DICOM-compliant software for PACS, Teleradiology and image/information systems management. With products installed at hundreds of locations throughout the world, RADinfo SYSTEMS is also a systems integrator, bundling our software with modality and hardware manufacturers' products to provide complete information and image management solutions backed by around-the-clock technical support. In addition to developing the interface software that exist on modalities today, the privately held RADinfo SYSTEMS supplies software products and system development for many major modality and healthcare product vendors.
